

Special Purpose Accounts (SPA)

What are SPA Accounts?

A CalNet ID that can be shared with multiple individuals.

Learn how to create and get the most out of a SPA account:

What are they used for?

- Create Shared Drives to easily manage access to files.
- Send email on behalf of a department or role.
- Create departmental calendars and share your department's events.

Unlike a personal account, the SPA account (and any resources managed by the SPA) are owned by the department, leaving the work accessible for teammates or new employees to a role.
